

CUSTOM LEARNING DEVELOPMENT

Training is an Essential Ingredient to the Health and Success of Organizations

TRAINING NEEDS

Effective training takes time, resources and content expertise. Some of the challenges that organizations face when confronting the issue of developing learning programs for their employees include:

- ▼ Do we have the time, personnel, resources and capacity to generate essential training?
- ▼ Do we have the experience to develop and deliver quality training that address our organization's needs?

LEARNING DEVELOPMENT

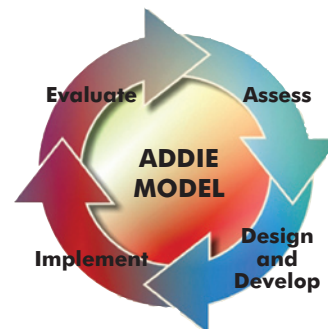

The Yale New Haven Health System Center for Emergency Preparedness and Disaster Response (YNHHS-CEPDR) can design and develop best-practice training to meet your organization's needs. These formats and enhancements include:

- ▼ Instructor-led workshops
- ▼ Facilitator and student guides
- ▼ Online courses
- ▼ Just-in-time learning
- ▼ Mini modules
- ▼ Procedure manuals
- ▼ Narrated demonstrations
- ▼ Guided self-testing
- ▼ Multimedia enhancements
- ▼ SCORM compliance
- ▼ WebEx instruction
- ▼ Custom learning management systems

OUR TEAM

YNHHS-CEPDR's instructional design team has the talent and experience necessary to create and develop training materials that meet your organization's particular needs. The team has multifaceted expertise in instructional design, multimedia, graphic design, course hosting, copy editing and project management, as well as access to an array of subject matter experts.

OUR SERVICES

YNHHS-CEPDR uses the ADDIE model approach. Through interviews, discussions and facilitated brainstorming, YNHHS-CEPDR instructional design team guides the process to:

- ▼ Establish learning objectives and assess the target audience
- ▼ Design and develop training that meets your organization's goals
- ▼ Implement and evaluate the training program created by testing and piloting deliverables to assure your satisfaction
